Artwork for Blocks

Files for blocking dies must be 'vector' eps files only. PDFs can be used but ideally supply as Illustrator EPS or AI files.

Not all eps files are vector files. A true vector is where the graphic is draw using paths and not pixels, this means that it can be used at any resolution or size without degradation.

Artwork must be solid black with NO tints, shading or colour.

A minimum of 8pt is required for text and 0.75pt for keylines when blocking onto diary or notebook covers, any smaller and the type or line will fill in when blocked and cannot be read.

Artwork Pricing

Producing blocking die artwork from correctly prepared vector graphic
FREE

Converting an image to vectored line format so it can be made into a blocking die, or adjusting unsuitable artwork so it is possible to block
£30
